

JAYELON LASSEIGNE

Software Engineer

Projects

The Broken Egg | [GitHub](#) | February 2023

- Recipe-browsing site built with React/Redux, TypeScript, and Tailwind CSS, and the Spoonacular API.
- Worked as the sole-developer, manipulating state across multiple components and developing a theme and styling.
- Users can search recipes from the API and can click on them for more information, such as ingredients and how to make it.

BetterReads | [GitHub](#) | January 2023

- Project built using Tailwind CSS, EJS, JavaScript, Node.js, Express, and PostgreSQL
- Implemented a cohesive styling across all pages, as well as assisted my partner in making various CRUD routes
- A site for authors to promote books and for readers to discover new reads

Park-a-pedia | [GitHub](#) | January 2023

- Frontend project built using HTML, CSS, JavaScript, and an API from the National Park Service
- Fetched and styled data using DOM Manipulation and async functions
- Users can search by park name, by state, or they can grab a random park

Work Experience

Assistant Language Teacher

JET Programme, Nagano, Japan

July 2017 to July 2022 (5 years)

- Built and maintained a curriculum for 6th grade English for four years
- Gave engaging lessons on English grammar and vocabulary, as well as cultural lessons designed to introduce students to different countries
- Tutored one to two students daily before or after school in English conversation

Block Leader for the Hokushin Area

JET Programme, Nagano, Japan

June 2018 to June 2021 (3 years)

- Lead presentations and discussions at multiple conferences for Assistant Language Teachers (ALTs) on topics such as 'Emergency Preparedness'
- Helped around ten ALTs a year settle into their lives in Japan by answering any and all questions and hosting welcome parties for them to meet other ALTs in the area
